Art Unit: 1621

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-35, drawn to a method of making compound, classified in for example class 568, subclass 300.
 - II. Claims 36-70, drawn to a method of making compounds, classified for example in class 558, and a variety of subclasses.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to a process for making a different class of compounds. Therefore they have a different function and they are not disclosed as capable of use together.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Claims 1-70 are generic to a plurality of disclosed patentably distinct species comprising for example the products and reactants disclosed in the specification. Applicant is required under 35 U.S.C. 121 to elect a single disclosed final product and the reactants resulting in the production of that species, even though this requirement is traversed.

Art Unit: 1621

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Samuel Barts whose telephone number is (703)308-4630. The Examiner's normal tour of duty is between 6:30-3:00, M-F. Any inquiry of a general nature or relating to the status of this application should be directed to the Group 1600 receptionist whose telephone number is (703) 308-1235. Communications may now be transmitted via FAX directly to group 1600. The official group 1200 FAX machine number is (703) 308-4556.
